

Martin Russell, Director  
Sales Solutions Ltd.,  
New Zealand

1. What all assessments/tests have you used of Central Test?

I have really only utilised the Sales Profile Test.

2. How did you like the quality of the tests?

Generally speaking, I believe the results to be "spookily accurate". The test results are well presented.

I say generally speaking because the results I have received recently from eight participants appear to be giving false results. I am aware of the actual level of skills with these individuals, or at least the sales results they are achieving, but these are VERY different from the Profile Test results. This has led to some concern as to the validity of the results from my client. There could have been the potential for some candidates to have asked another party to complete the test, but the only way to check that would be to ask them to sit another test, this time under heavy supervision.

3. Your personal opinion about our assessments and our organization?

Professional, helpful and cost effective.
